EXPERIENCE

Founder & Lead Developer

Mar 2022 - Present

Crave Corners

Istanbul, Turkey

- Developed a full-fledged platform for restaurants to partner and manage orders, discounts, and ads.
- Enabled real-time order processing, tracking, and product management.
- Integrated profit analytics and customer point systems for enhanced engagement.
- Created separate websites using Laravel 9 for main, partner, and company dashboards.
- Developed a cross-platform mobile app using React Native for seamless access to platform features.

Full-Stack Developer

Oct 2023 - Feb 2024

Oxygen Technology

Remote

- Developed a cross-platform sign language education app using React Native.
- Integrated Zoom for live events and built-in payment system for seamless transactions.
- Offered online courses with certification, alongside an extensive sign language dictionary.
- Provided live support calls with sign language translators for real-time assistance.
- Implemented landing page and dashboard using Laravel 10 for smooth management.

Full-Stack Developer

Road Logistics

Jul 2023 – Jan 2024

Remote

- Developed a Next.js dashboard for tracking shipments and sending automated WhatsApp messages.
- Integrated third-party WhatsApp messaging provider for seamless communication.
- Utilized Node.js, Express.js, and MongoDB for backend development.
- Implemented automated SMS messaging system for shipment updates.
- Created responsive frontend using Next.js and Tailwind CSS.

PROJECTS

E-commerce website. Created a comprehensive e-commerce platform using Next.js, Node.js, MongoDB, Tailwind CSS, and TypeScript. The website encompasses all essential functionalities expected of an e-commerce platform, including product showcase, customizable options, cart management, and secure payment processing.

Resume Enhancer Powered by AI. The Resume Enhancer is an innovative tool developed using the MERN stack (MongoDB, Express.js, React.js, Node.js), leveraging the power of AI to optimize resumes for better job opportunities. This platform offers users the capability to convert any resume template into Applicant Tracking System (ATS) and Harvard templates, ensuring compatibility with a wide range of hiring systems and adherence to industry standards.

URL Shortener. This project is a comprehensive URL shortener built using the MERN stack (MongoDB, Express.js, React.js, and Node.js). It enables users to condense lengthy URLs into concise, shareable links. The platform offers an intuitive interface for both URL shortening and redirection.
